The next edition of this Standard is scheduled for publication in 2006. There will be no addenda issued to this edition.

ASME will issue written replies to inquiries concerning interpretations of technical aspects of this Standard.

ASME is the registered trademark of The American Society of Mechanical Engineers.

This code or standard was developed under procedures accredited as meeting the criteria for American National Standards. The Standards Committee that approved the code or standard was balanced to assure that individuals from competent and concerned interests have had an opportunity to participate. The proposed code or standard was made available for public review and comment that provides an opportunity for additional public input from industry, academia, regulatory agencies, and the public-at-large.

ASME does not "approve," "rate," or "endorse" any item, construction, proprietary device, or activity.

ASME does not take any position with respect to the validity of any patent rights asserted in connection with any items mentioned in this document, and does not undertake to insure anyone utilizing a standard against liability for infringement of any applicable letters patent, nor assumes any such liability. Users of a code or standard are expressly advised that determination of the validity of any such patent rights, and the risk of infringement of such rights, is entirely their own responsibility.

Participation by federal agency representative(s) or person(s) affiliated with industry is not to be interpreted as government or industry endorsement of this code or standard.

ASME accepts responsibility for only those interpretations of this document issued in accordance with the established ASME procedures and policies, which precludes the issuance of interpretations by individuals.

## FOREWORD

The purpose of ASME 3287 Standard is to establish symbols for use on operator controls and other displays on powered industrial trucks.

Symbols by definition are visually perceptible figures used to transmit information independent of language.

This Standard allows some enhancement of the symbol through increased line thickness, rounded corners, or other minor modifications, provided that the essential perceptual characteristics of the symbol are maintained.

This Standard specifies that the symbols shall be used in the orientation shown in the Standard and shall be located on or adjacent to the control or display that is being identified.

The ISO 3287: 1999 Standard was prepared by ISO Technical Committee 110, Industrial Trucks. This technical committee is also responsible for all enhancements and revisions to the Standard. This international Standard is a revised and extended version of ISO 3287: 1978.

The United States Technical Advisory Group (TAG) to ISO/TC 110 is active in all of the activities of this committee. It seeks to ensure that all standards written by ISO/TC 110 are consistent with United States' interests. This is done by representative membership on the U.S. TAG, by circulating drafts of proposed standards widely in the United States for comment, and by ensuring that these comments are considered by the appropriate ISO/TC 110 working group. By these means, most new or revised international standards can be adopted readily as American National Standards. Although there are editorial changes to incorporate American language usage and spelling, the American National Standards are equivalent to the corresponding ISO Standards.

ASME 3287-2001 was approved as an American National Standard on February 28, 2001.

## CORRESPONDENCE WITH THE B56 COMMITTEE

*General.* ASME Standards are developed and maintained with the intent to represent the consensus of concerned interests. As such, users of this Standard may interact with the Committee by requesting interpretations, proposing revisions, and attending Committee meetings. Correspondence should be addressed to:

Secretary, B56 Standards Committee  
The American Society of Mechanical Engineers  
Three Park Avenue  
New York, NY 10016-5990

*Proposing Revisions.* Revisions are made periodically to the Standard to incorporate changes that appear necessary or desirable, as demonstrated by the experience gained from the application of the Standard. Approved revisions will be published periodically.

The Committee welcomes proposals for revisions to this Standard. Such proposals should be as specific as possible, citing the paragraph number(s), the proposed wording, and a detailed description of the reasons for the proposal, including any pertinent documentation.

*Interpretations.* Upon request, the B56 Standards Committee will render an interpretation of any requirement of the Standard. Interpretations can only be rendered in response to a written request sent to the Secretary of the B56 Standards Committee.

The request for interpretation should be clear and unambiguous. It is further recommended that the inquirer submit his/her request in the following format:

Subject:	Cite the applicable paragraph number(s) and the topic of the inquiry.
Edition:	Cite the applicable edition of the Standard for which the interpretation is being requested.
Question:	Phrase the question as a request for an interpretation of a specific requirement suitable for general understanding and use, not as a request for an approval of a proprietary design or situation. The inquirer may also include any plans or drawings which are necessary to explain the question; however, they should not contain proprietary names or information.

Requests that are not in this format will be rewritten in this format by the Committee prior to being answered, which may inadvertently change the intent of the original request.

ASME procedures provide for reconsideration of any interpretation when or if additional information that might affect an interpretation is available. Further, persons aggrieved by an interpretation may appeal to the cognizant ASME Committee or Subcommittee. ASME does not "approve," "certify," "rate," or "endorse" any item, construction, proprietary device, or activity.

*Attending Committee Meetings.* The B56 Standards Committee regularly holds meetings, which are open to the public. Persons wishing to attend any meeting should contact the Secretary of the B56 Standards Committee.

# POWERED INDUSTRIAL TRUCKS: SYMBOLS FOR OPERATOR CONTROLS AND OTHER DISPLAYS

## 1 SCOPE

This Standard establishes symbols for use on operator controls and other displays on powered industrial trucks.

## 2 NORMATIVE REFERENCES

The following normative documents contain provisions which, through reference in this text, constitute provisions of this Standard. For dated references, subsequent amendments to, or revisions of, any of these publications do not apply. However, parties to agreements based on this Standard are encouraged to investigate the possibility of applying the most recent editions of the normative documents indicated below. For undated references, the latest edition of the normative document referred to applies. Members of ISO and IEC maintain registers of currently valid international standards.

ISO 3461-1: 1988, General Principles for the Creation of Graphical Symbols — Part 1: Graphical Symbols for Use on Equipment.

ISO 4196, Graphical Symbols — Use of Arrows.

## 3 TERM AND DEFINITION

For the purposes of this Standard, the following term and definition apply.

### 3.1

*symbol*: visually perceptible figure used to transmit information independently of language.

NOTE: It may be produced by drawing, printing, or other means.

## 4 GENERAL

### 4.1

Symbols shall be as shown in succeeding clauses of this Standard. However, symbols that are shown in outline form may, in actual use, be filled for enhanced clarity of reproduction and improved visual perception

by the operator, except as otherwise noted for individual symbols.

### 4.2

Limitations inherent in some reproduction and display technologies may require increased line thickness or other minor modifications of symbols. Such modifications are acceptable, provided the symbol remains unchanged in its basic graphical elements and easily discernible by the operator.

### 4.3

Additionally, to improve the appearance and perceptibility of a graphical symbol, or to coordinate with the design of the equipment to which the symbol is applied, it may be necessary to change the line thickness or round the corners of a symbol. The graphic designer is normally free to make such changes, provided that the essential perceptual characteristics of the symbol are maintained. See ISO 3461-1: 1988, subclause 10.2.

### 4.4

For actual use, all symbols shall be reproduced large enough to be easily discernible by the operator. See ISO 3461-1 for guidelines on the proper sizing of symbols. Symbols shall be used in the orientation shown in this Standard unless otherwise noted for individual symbols.

### 4.5

Most symbols are constructed using a building block approach in which various symbols and symbol elements are combined in a logical manner to produce new symbols.

### 4.6

If a symbol shows a machine or parts of a machine from a side view, a machine moving from right to left across the symbol grid area shall be assumed. If a symbol shows a machine or parts of a machine from

an overhead view, a machine moving from bottom to top across the symbol grid area shall be assumed.

#### 4.7

Symbols on controls and displays shall have a good contrast to their background. A light symbol on a dark background is preferred for most controls. Displays may use either a light symbol on a dark background or a dark symbol on a light background, depending upon which alternative provides the best visual perception. When a symbol image is reversed (for example, from black on white to white-on-black and vice versa), it shall be done for the entire symbol.

#### 4.8

Symbols shall be located on or adjacent to the control or display that is being identified. Where more than one symbol is required for a control, the symbols shall be located in relation to the control such that movement of the control toward the symbol shall affect the function depicted by that symbol.

#### 4.9

Arrows used in symbols shall conform to the requirements of ISO 4196. ISO 3461-1 shall be consulted for the general principles of creating symbols.

#### 4.10

ISO/IEC registration numbers are shown for symbols in this Standard. Registration numbers below 5000 refer to ISO 7000. Registration numbers above 5000 refer to IEC 417.

ISO 7000: 1989, Graphical Symbols for Use on Equipment — Index and Synopsis.

IEC 417: 1973, Graphical Symbols for Use on Equipment — Index, Survey and Compilation of the Single Sheets, and its Supplements (IEC 417A: 1974, IEC 417B: 1975, IEC 417C: 1977, IEC 417D: 1978, IEC 417E: 1980, IEC 417F: 1982, IEC 417G: 1985, IEC

417H: 1987, IEC 417J: 1990, IEC 417K: 1991, IEC 417L: 1993, IEC 417M: 1994).

#### 4.11

Letters and numerals may be used as symbols, but are not registered by ISO/TC 145 or published in ISO 7000. The fonts shown in this Standard are not intended to be restrictive; other fonts may be substituted, but care shall be taken to ensure that legibility is maintained.

#### 4.12

Symbols in this Standard are presented within the outer limits of a 24 mm square grid (32% of original size on the ISO graphics grid). Grid marks "L" delimit the corners of the 75 mm square graphics grid from ISO 3461-1. Corner marks are not part of the symbol, but are provided to ensure consistent presentation of all symbol graphics.

### 5 COLOR

#### 5.1

When used on illuminated displays, the following colors have the meanings indicated:

- (a) *red*: failure, serious malfunction, or dangerous operating condition that requires immediate attention;
- (b) *yellow* or *amber*: outside normal operating limits or approaching a dangerous operating condition;
- (c) *green*: normal operating conditions.

#### 5.2

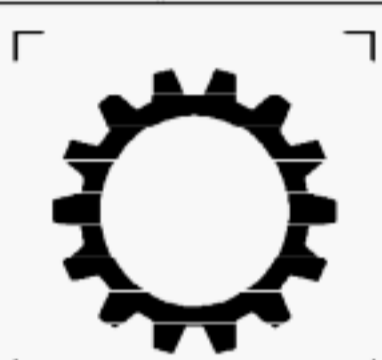

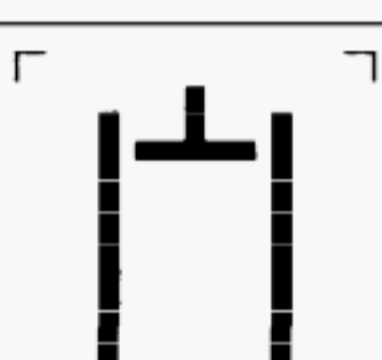

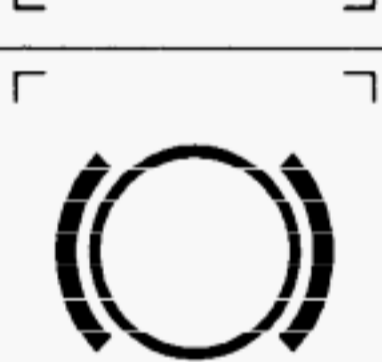

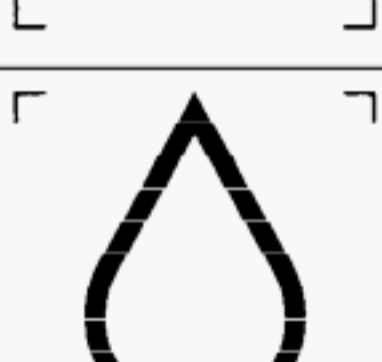

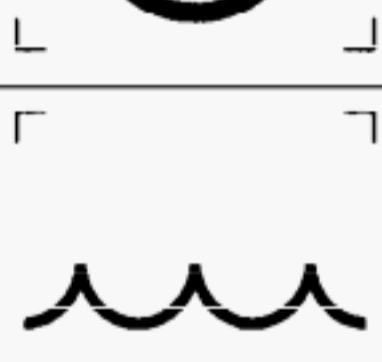

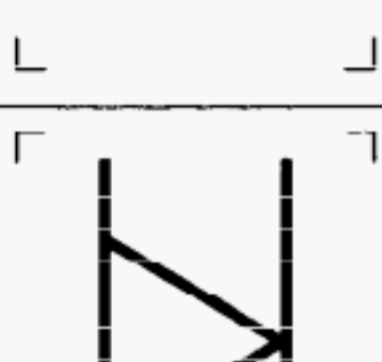

In addition, certain colors are used for specific functions:

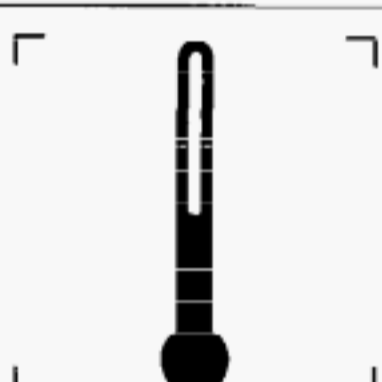

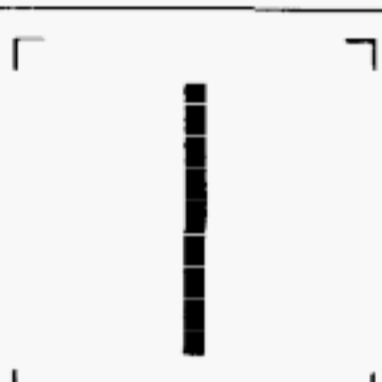

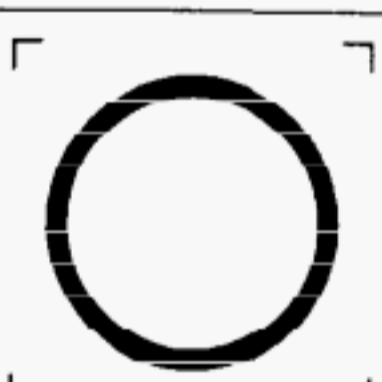

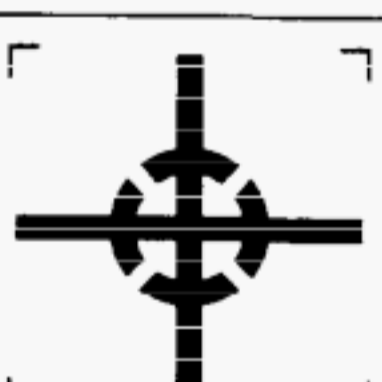

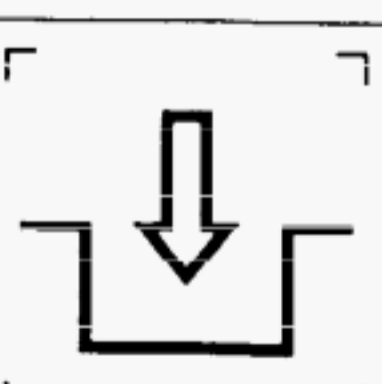

- (a) *blue*: headlight main/high beam display;
- (b) *red*: hazard warning display;
- (c) *green*: turn signal display.

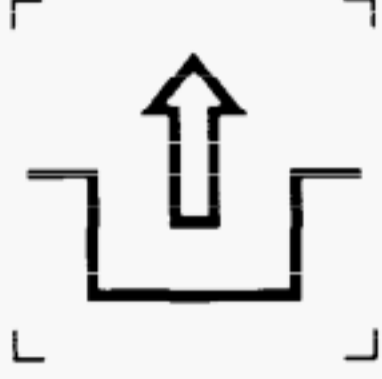

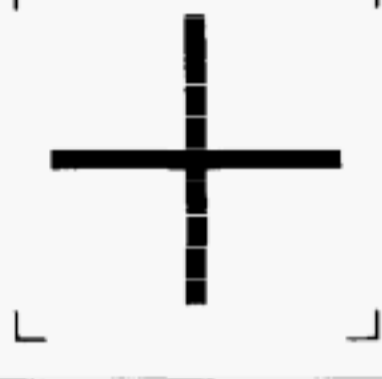

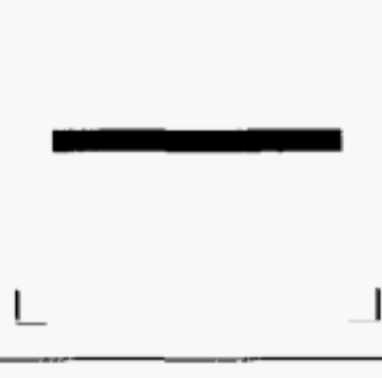

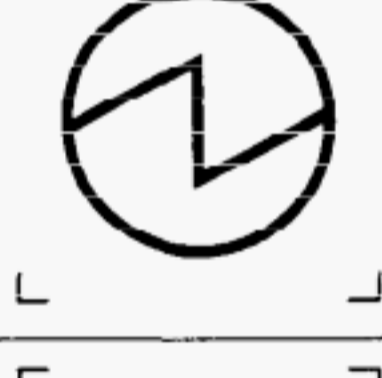

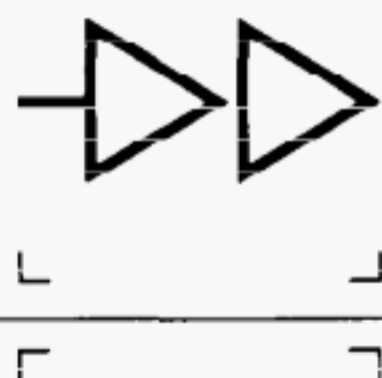

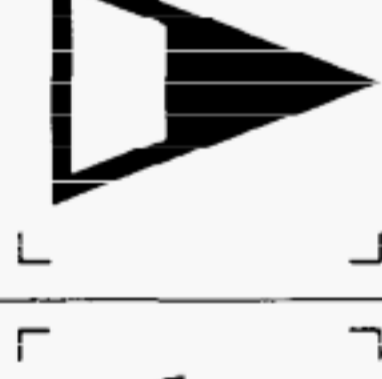

#### 5.3

If color is used on symbols for heating and/or cooling systems, the color *red* shall be used to indicate hot and the color *blue* shall be used to indicate cold.

## 9 DRIVING CONTROLS SYMBOLS

Reference Number	Symbol Form/Shape	Symbol Description/Application	ISO/IEC Registration Number
9.1		2-wheel steering — Front (Powered industrial trucks)	2391
9.2		2-wheel steering — Rear (Powered industrial trucks)	2392
9.3		All (4) wheel steering (Powered industrial trucks)	2393

Reference Number	Symbol Form/Shape	Symbol Description/Application	ISO/IEC Registration Number
9.4		Crab steering (Powered industrial trucks)	2394
9.5		Axle connect — All-wheel drive (Add symbols for "on" and "off" or "engage" and "disengage" as needed.)	1203
9.6		Differential lock (Add symbols for "on" and "off" as needed.)	1662
9.7		Operating direction — Forward/reverse	1436
9.8		Operating direction — Multiple direction	1703

## 10 ENGINE SYMBOLS

Reference Number	Symbol Form/Shape	Symbol Description/Application	ISO/IEC Registration Number
10.1		Engine lubricating oil — Pressure	1374

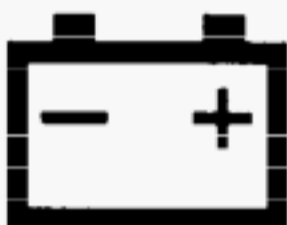

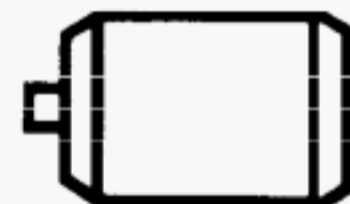

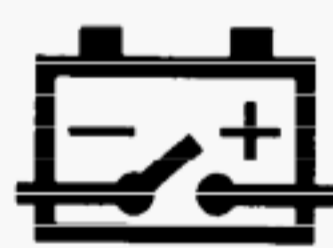

Reference Number	Symbol Form/Shape	Symbol Description/Application	ISO/IEC Registration Number
10.2		Engine lubricating oil — Level	1373
10.3		Engine lubricating oil — Filter	1376
10.4		Engine lubricating oil — Temperature	1375
10.5		Engine coolant — Pressure	1379
10.6		Engine coolant — Level	1378
10.7		Engine coolant — Temperature	1380
10.8		Engine combustion air	1381

Reference Number	Symbol Form/Shape	Symbol Description/Application	ISO/IEC Registration Number
10.9		Engine combustion air — Pressure	1382
10.10		Engine combustion air — Filter	1170
10.11		Engine combustion air — Temperature	1383
10.12		Engine air filter — Pressure	2395
10.13		Engine exhaust gas	1384
10.14		Engine exhaust gas — Pressure	1385
10.15		Engine exhaust gas — Temperature	1386

Reference Number	Symbol Form/Shape	Symbol Description/Application	ISO/IEC Registration Number
10.16		Engine — Start	1387
10.17		Engine — Stop	1388
10.18		Engine — Failure/malfunction	1371
10.19		Engine — Rotational speed/frequency	1389
10.20		Choke (cold starting aid)	0243
10.21		Electrical preheat (low temperature start aid)	1704
10.22		Gas injection (low temperature start aid)	1547

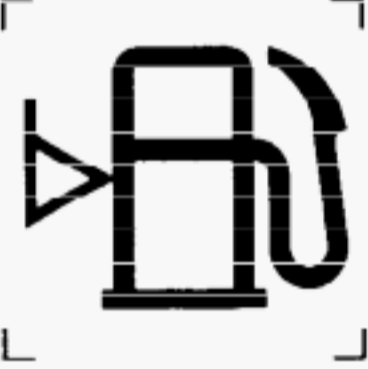

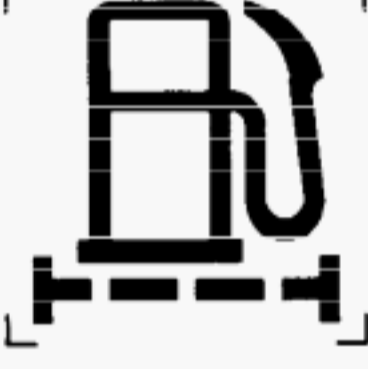

Reference Number	Symbol Form/Shape	Symbol Description/Application	ISO/IEC Registration Number
10.23		Engine — Water jacket heater	2384

**11 ELECTRICAL SYSTEM SYMBOLS**

Reference Number	Symbol Form/Shape	Symbol Description/Application	ISO/IEC Registration Number
11.1		Battery/charging condition	0247
11.2		Circuit breaker	2400
11.3		Electric motor	0011
11.4		Battery power — Disconnect	2063
11.5		On/off	5010

Reference Number	Symbol Form/Shape	Symbol Description/Application	ISO/IEC Registration Number
11.6		Horn	0244

## 12 FUEL SYMBOLS

Reference Number	Symbol Form/Shape	Symbol Description/Application	ISO/IEC Registration Number
12.1		Fuel — Pressure	1392
12.2		Fuel — Level	1551
12.3		Fuel — Filter	1393
12.4		Fuel — Temperature	1394
12.5		Fuel — Shut-off (Not to be used as engine stop symbol.)	1395

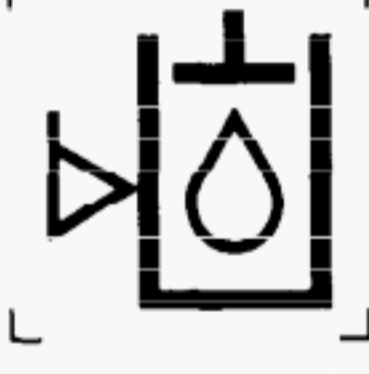

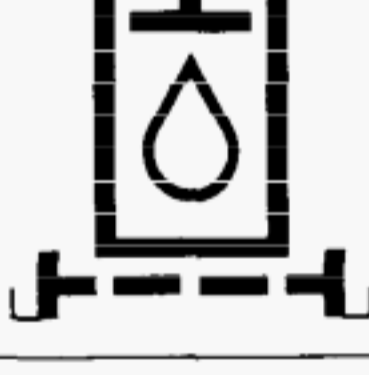

Reference Number	Symbol Form/Shape	Symbol Description/Application	ISO/IEC Registration Number
12.6		Diesel (compression-ignition) fuel	1541
12.7		Gasoline (petrol) fuel	0245
12.8		Unleaded fuel only	0237
12.9		LPG fuel	2489

### 13 TRANSMISSION SYMBOLS

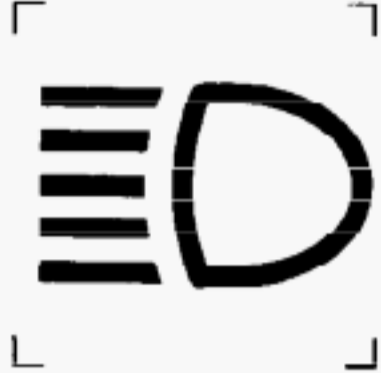

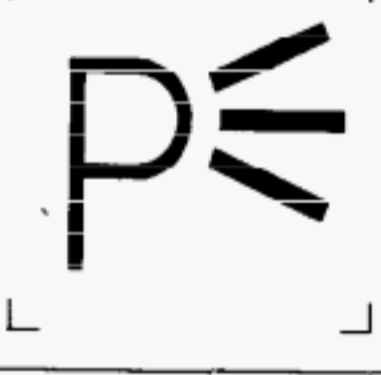

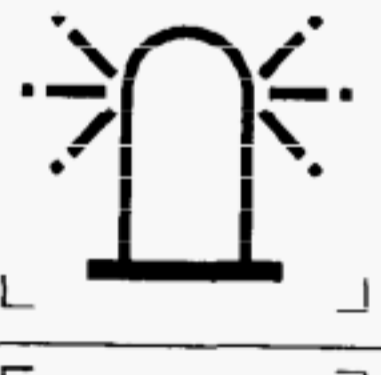

Reference Number	Symbol Form/Shape	Symbol Description/Application	ISO/IEC Registration Number
13.1		Transmission oil — Pressure	1167
13.2		Transmission oil — Level	1398

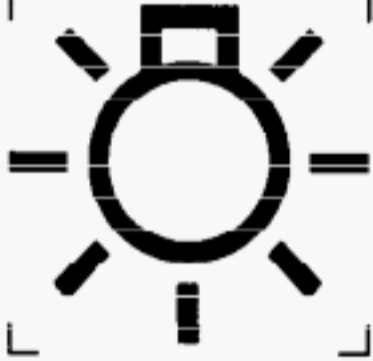

Reference Number	Symbol Form/Shape	Symbol Description/Application	ISO/IEC Registration Number
13.3		Transmission oil — Filter	1169
13.4		Transmission oil — Temperature	1168

#### 14 HYDRAULIC SYSTEM SYMBOLS

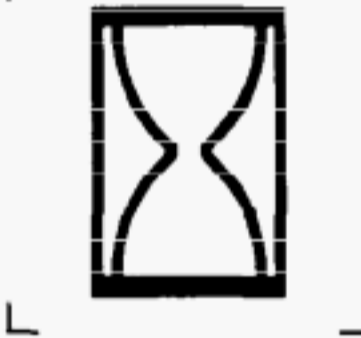

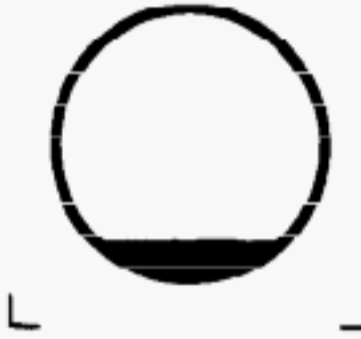

Reference Number	Symbol Form/Shape	Symbol Description/Application	ISO/IEC Registration Number
14.1		Hydraulic oil — Pressure	1413
14.2		Hydraulic oil — Level	1412
14.3		Hydraulic oil — Filter	1415
14.4		Hydraulic oil — Temperature	1414

## 15 LIGHTING SYMBOLS

Reference Number	Symbol Form/Shape	Symbol Description/Application	ISO/IEC Registration Number
15.1		Headlights — Main/high beam	0082
15.2		Headlights — Dipped/low beam	0083
15.3		Work light	1204
15.4		Parking lights	0240
15.5		Hazard warning lights	0085
15.6		Beacon/identifying light (rotating patrol light)	1141
15.7		Clearance/position lights	0456

Reference Number	Symbol Form/Shape	Symbol Description/Application	ISO/IEC Registration Number
15.8		Turn signals	0084
15.9		Front fog lights (If one control is used for both front and rear fog lights, the symbol designated front fog lights shall be used.)	0633
15.10		Rear fog lights (If one control is used for both front and rear fog lights, the symbol designated front fog lights shall be used.)	0634
15.11		Spotlight	1700
15.12		Master lighting switch	5012
15.13		Interior lighting	1421

## 16 MAINTENANCE SYMBOLS

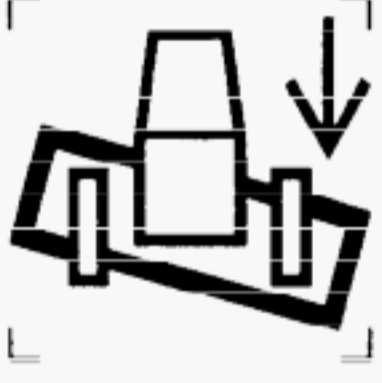

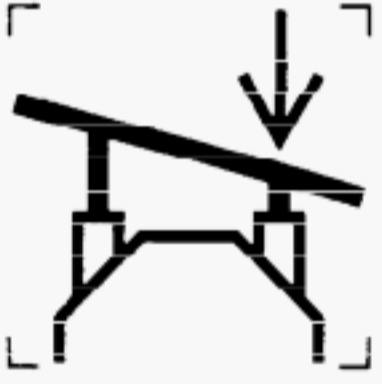

Reference Number	Symbol Form/Shape	Symbol Description/Application	ISO/IEC Registration Number
16.1		Consult instruction book	0790
16.2		Read maintenance manual	1659
16.3		Hourmeter/elapsed operating hours	1366
16.4		Service engine soon	2399
16.5		Volume — Empty	1563
16.6		Volume — Half-full	1564
16.7		Volume — Full	1565

Reference Number	Symbol Form/Shape	Symbol Description/Application	ISO/IEC Registration Number
16.8		Grease lubrication point	0787
16.9		Oil lubrication point	0391
16.10		Lift point	1368
16.11		Tyre — Pressure	1435
16.12		Tie down point	2069

**17 LOAD-HANDLING CONTROL SYMBOLS****17.1 Blade Symbols**

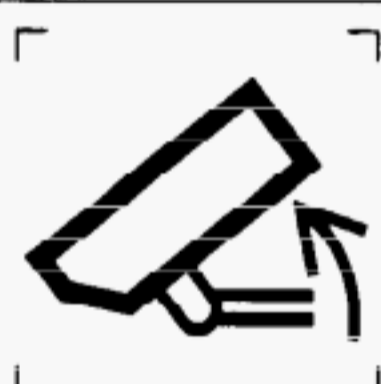

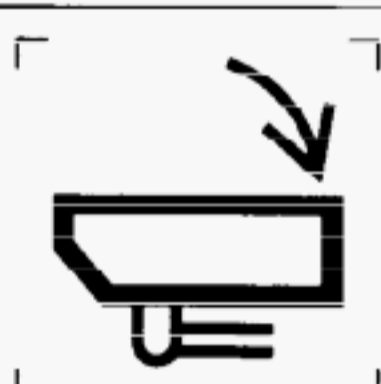

NOTE: In symbols 17.1.7 to 17.1.8, the blade is viewed from the perspective of a person looking forward along the axis of the machine. In symbols 17.1.9 to 17.1.10, the blade is viewed from the perspective of a person looking at the blade from above the machine.

Reference Number	Symbol Form/Shape	Symbol Description/Application	ISO/IEC Registration Number
17.1.1		Blade — Raise	1452
17.1.2		Blade — Lower	1453
17.1.3		Blade — Hold	1454
17.1.4		Blade — Float	1455
17.1.5		Blade — Pitch forward	1461
17.1.6		Blade — Pitch rearward	1460

Reference Number	Symbol Form/Shape	Symbol Description/Application	ISO/IEC Registration Number
17.1.7		Blade — Tilt left	1457
17.1.8		Blade — Tilt right	1456
17.1.9		Blade — Angle left	1459
17.1.10		Blade — Angle right	1458

## 17.2 Bucket Symbols

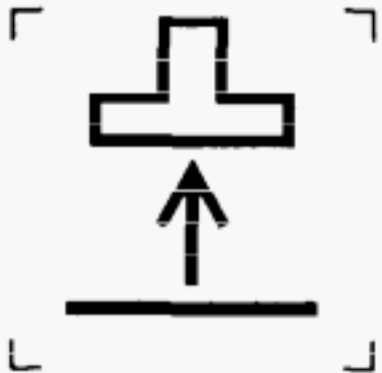

Reference Number	Symbol Form/Shape	Symbol Description/Application	ISO/IEC Registration Number
17.2.1		Bucket — Raise	1438
17.2.2		Bucket — Lower	1439

17.2.10		Multi-purpose bucket — Close	1447

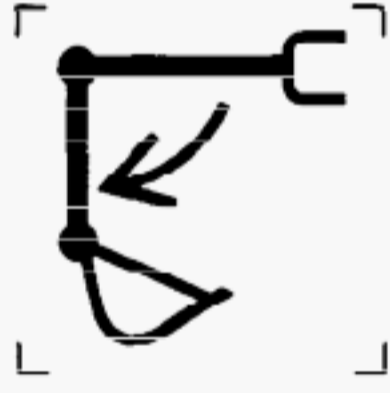

### 17.3 Stability Control Symbols

NOTE: In symbols 17.3.1 to 17.3.4, the stabilizer is viewed from the perspective of a person looking forward along the axis of the machine.

Reference Number	Symbol Form/Shape	Symbol Description/Application	ISO/IEC Registration Number
17.3.1		Left stabilizer — Up/raise	2073
17.3.2		Left stabilizer — Down/lower	2074
17.3.3		Right stabilizer — Up/raise	1292
17.3.4		Right stabilizer — Down/lower	1291
17.3.5		Stabilizers — Up	1294

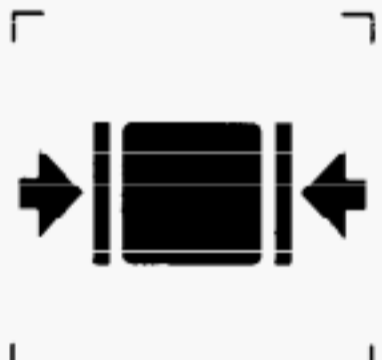

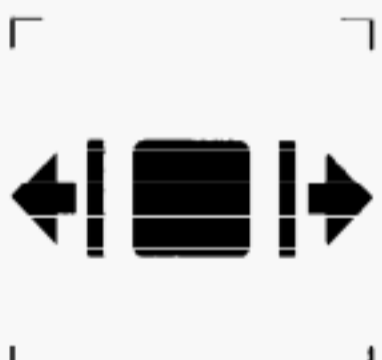

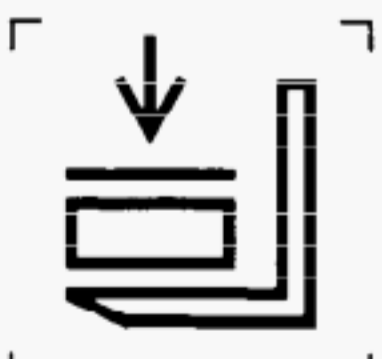

Reference Number	Symbol Form/Shape	Symbol Description/Application	ISO/IEC Registration Number
17.3.6		Stabilizers — Down	1293

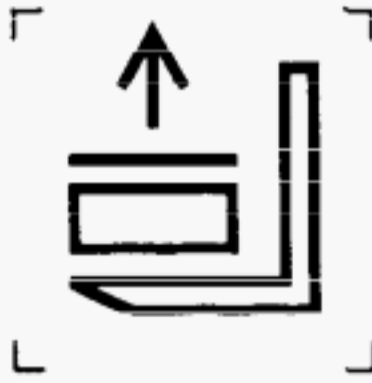

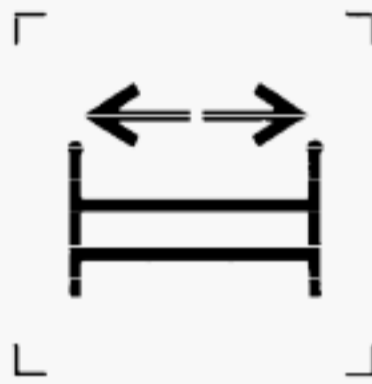

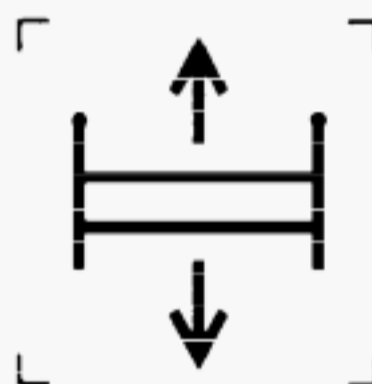

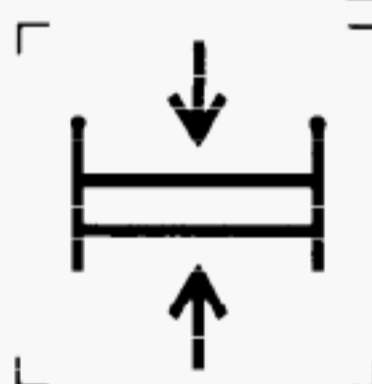

**17.4 Backhoe Control Symbols**

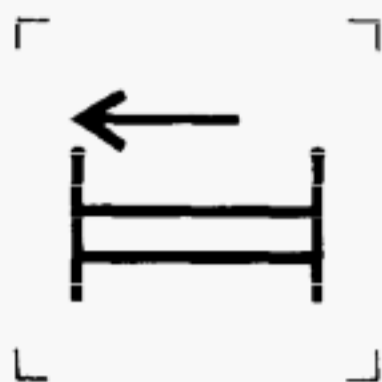

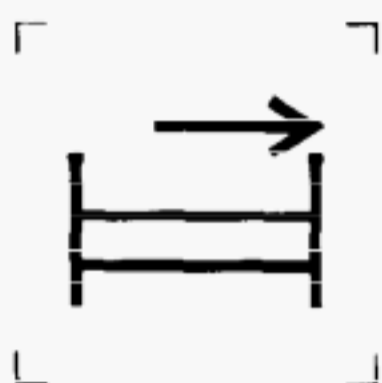

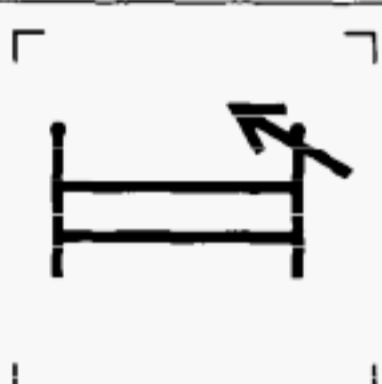

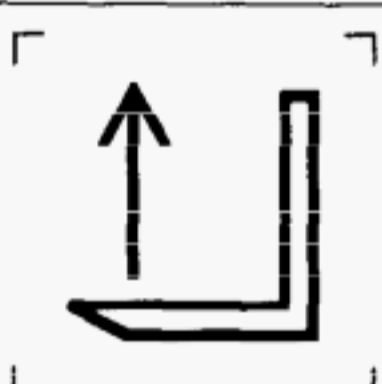

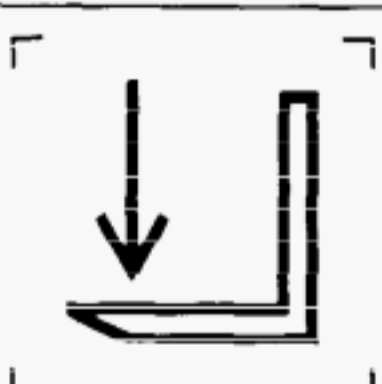

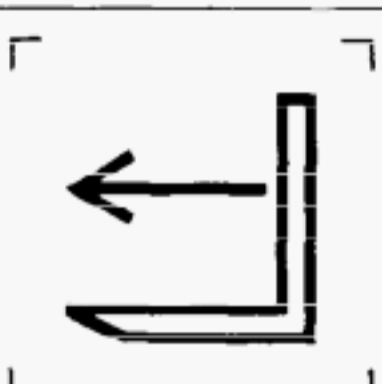

Reference Number	Symbol Form/Shape	Symbol Description/Application	ISO/IEC Registration Number
17.4.1		Backhoe — Raise	1470
17.4.2		Backhoe — Lower	1469
17.4.3		Backhoe — Arm — Out	1474
17.4.4		Backhoe — Arm — In	1473
17.4.5		Backhoe — Bucket — Dig	1478

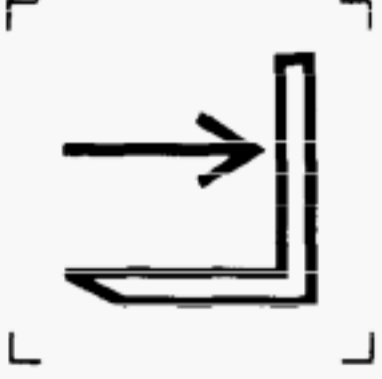

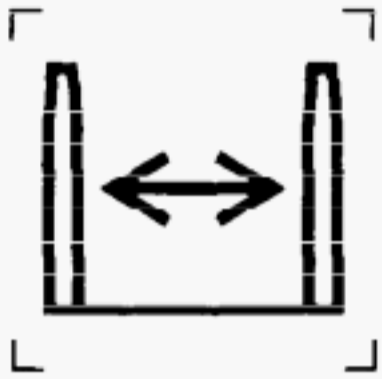

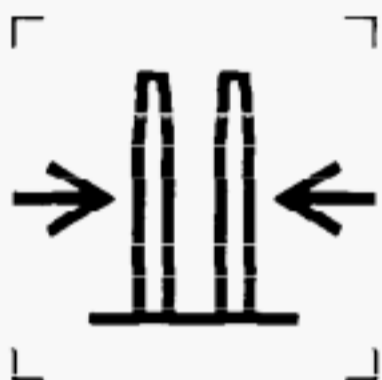

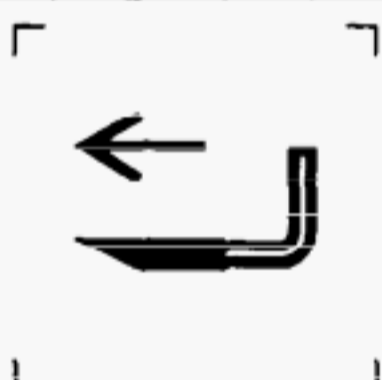

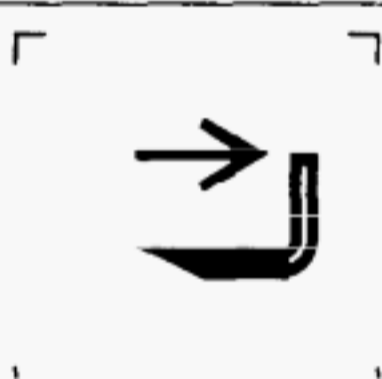

Reference Number	Symbol Form/Shape	Symbol Description/Application	ISO/IEC Registration Number
17.4.6		Backhoe — Bucket — Dump	1477
17.4.7		Backhoe — Swing left	1480
17.4.8		Backhoe — Swing right	1479

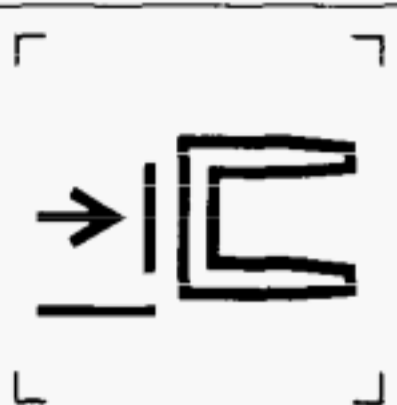

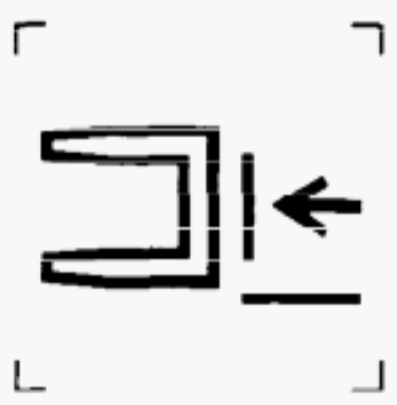

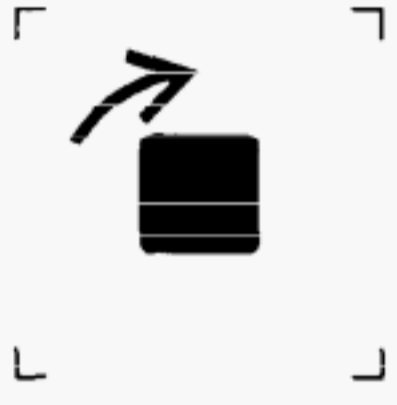

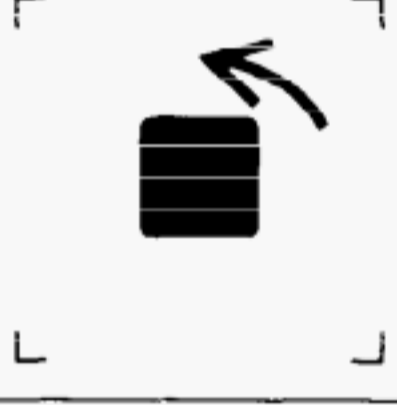

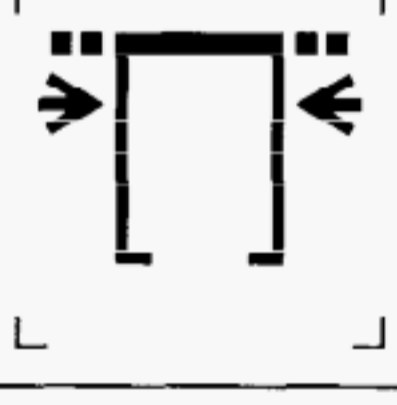

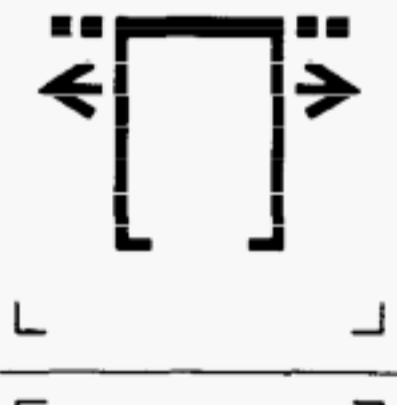

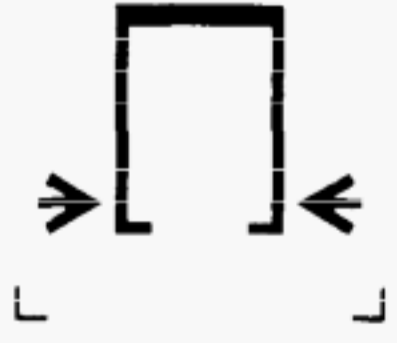

### 17.5 Additional Load-Handling Control Symbols

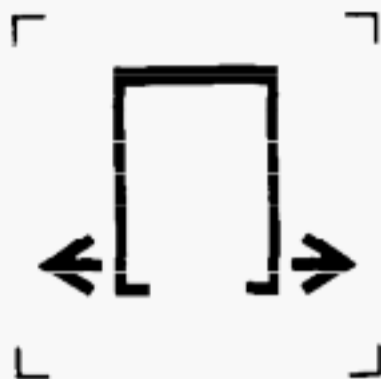

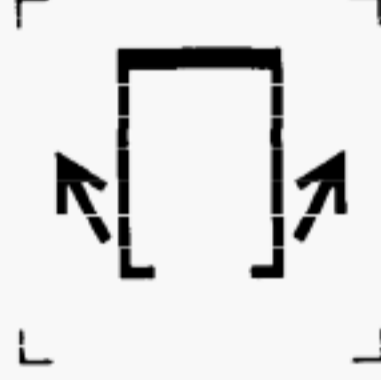

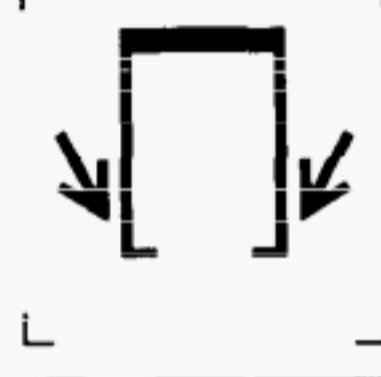

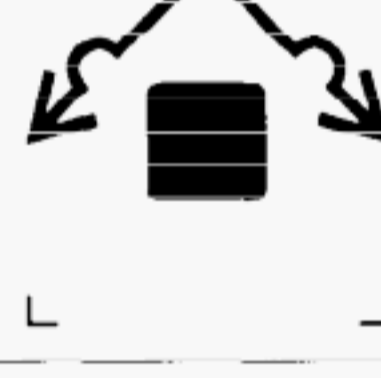

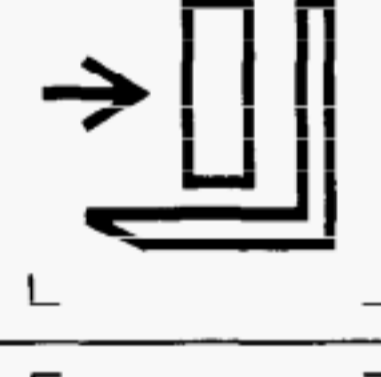

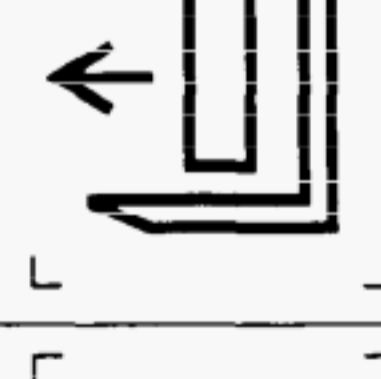

Reference Number	Symbol Form/Shape	Symbol Description/Application	ISO/IEC Registration Number
17.5.1		Clamp	0631
17.5.2		Clamp — Release	2338
17.5.3		Load stabilizer — Clamp	1196

Reference Number	Symbol Form/Shape	Symbol Description/Application	ISO/IEC Registration Number
17.5.4		Load stabilizer — Release	1195
17.5.5		Container handling sidelifift attachment — Extend laterally	2359
17.5.6		Container handling sidelifift attachment — Retract laterally	2361
17.5.7		Container handling sidelifift attachment — Extend vertically	2360
17.5.8		Container handling sidelifift attachment — Retract vertically	2362
17.5.9		Container handling sidelifift attachment — Rotate clockwise	2363
17.5.10		Container handling sidelifift attachment — Rotate anticlockwise	2364

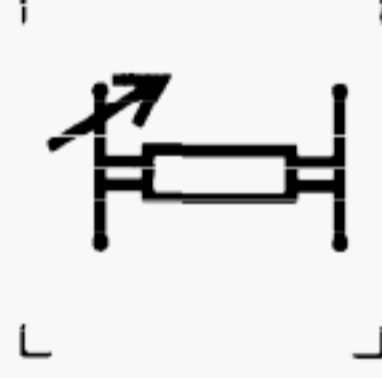

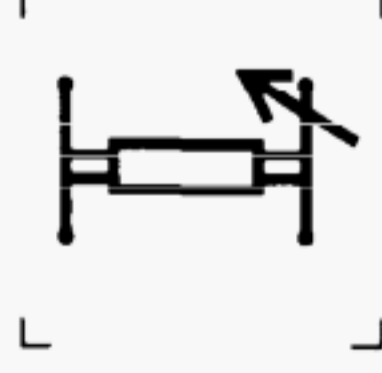

Reference Number	Symbol Form/Shape	Symbol Description/Application	ISO/IEC Registration Number
17.5.11		Container handling sidelifift attachment — Sideshift left	2365
17.5.12		Container handling sidelifift attachment — Sideshift right	2366
17.5.13		Container handling sidelifift attachment — Slew clockwise	2368
17.5.14		Container handling sidelifift attachment — Slew anticlockwise	2367
17.5.15		Fork — Raise	1184
17.5.16		Fork — Lower	1183
17.5.17		Fork arm reach — Extend	1187

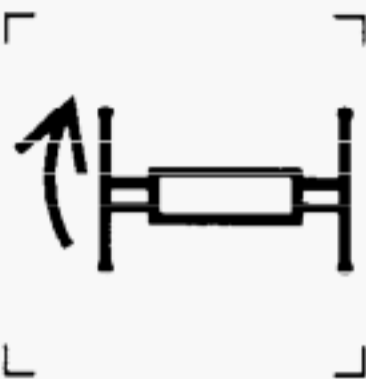

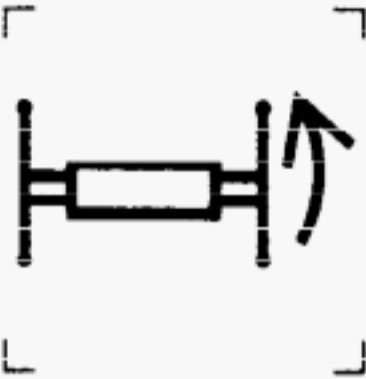

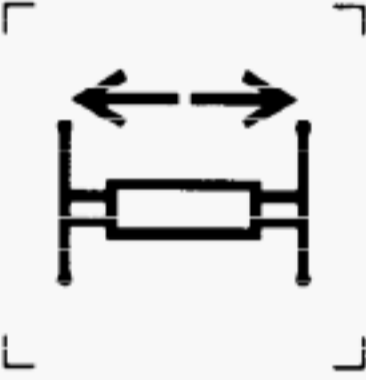

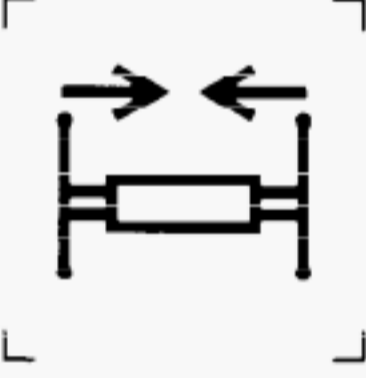

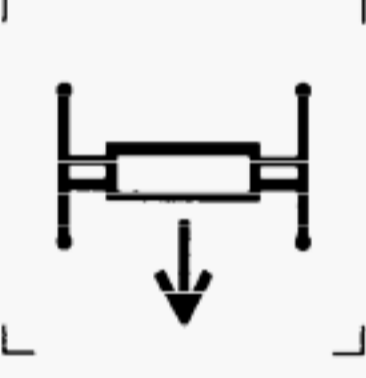

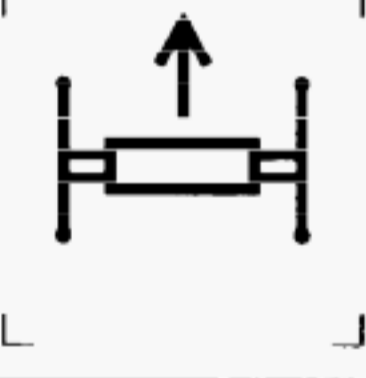

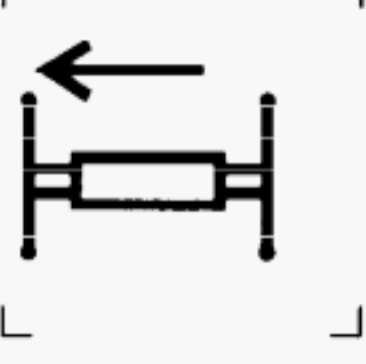

Reference Number	Symbol Form/Shape	Symbol Description/Application	ISO/IEC Registration Number
17.5.18		Fork arm reach — Retract	1188
17.5.19		Fork spread — Open	1191
17.5.20		Fork spread — Close	1192
17.5.21		Fork arm extension — Extend	2408
17.5.22		Fork arm extension — Retract	2409
17.5.23		Lateral stacking truck — Mechanism — Rotate left	2343
17.5.24		Lateral stacking truck — Mechanism — Rotate right	2344

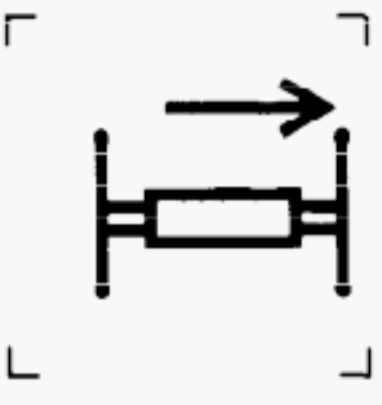

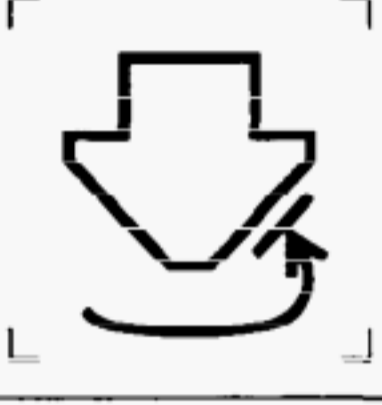

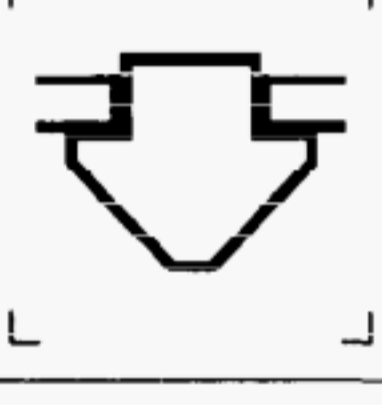

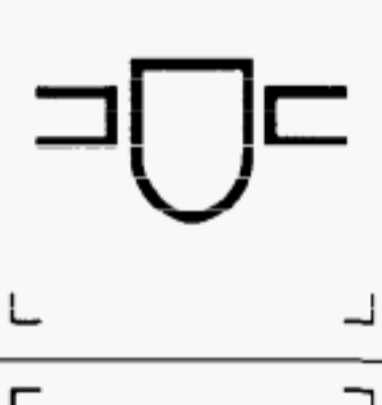

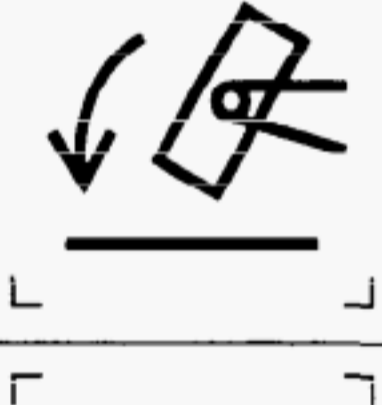

Reference Number	Symbol Form/Shape	Symbol Description/Application	ISO/IEC Registration Number
17.5.25		Lateral stacking truck — Mechanism — Sideshift right	2342
17.5.26		Lateral stacking truck — Mechanism — Sideshift left	2341
17.5.27		Load — Rotate clockwise	2346
17.5.28		Load — Rotate anticlockwise	2345
17.5.29		Piggy back arms — Block-stacking — In	2351
17.5.30		Piggy back arms — Block-stacking — Out	2352
17.5.31		Piggy back arms — Clamp	2348

Reference Number	Symbol Form/Shape	Symbol Description/Application	ISO/IEC Registration Number
17.5.32		Piggy back arms — Unclamp	2347
17.5.33		Piggy back arms — Fold up	2349
17.5.34		Piggy back arms — Fold down	2350
17.5.35		Piggy back rotation limit — Override	2353
17.5.36		Push/pull attachment — Pull	2356
17.5.37		Push/pull attachment — Push	1197
17.5.38		Lift arm reach — Extend limited	2396

Reference Number	Symbol Form/Shape	Symbol Description/Application	ISO/IEC Registration Number
17.5.39		Lift arm lift — Limited movement	2397
17.5.40		Sideloader platform — Tilt up (forward)	2354
17.5.41		Sideloader platform — Tilt down (back)	2355
17.5.42		Sideshift — left	1189
17.5.43		Sideshift — Right	1190
17.5.44		Sideshift — Centralize	2398
17.5.45		Sway control/leveling — Clockwise	2390

Reference Number	Symbol Form/Shape	Symbol Description/Application	ISO/IEC Registration Number
17.5.46		Sway control/leveling — Anticlockwise	2389
17.5.47		Swing — Clockwise	1194
17.5.48		Swing — Anticlockwise	1193
17.5.49		Tilt — Forward	1185
17.5.50		Tilt — Rearward	1186
17.5.51		Toplift side tilt — Left-hand side up	2378
17.5.52		Toplift side tilt — Right-hand side up	2379

Reference Number	Symbol Form/Shape	Symbol Description/Application	ISO/IEC Registration Number
17.5.53		Toplift slew — Clockwise	2380
17.5.54		Toplift slew — Anticlockwise	2381
17.5.55		Toplift — Extend laterally	2372
17.5.56		Toplift — Retract laterally	2375
17.5.57		Toplift — Reach in	2374
17.5.58		Toplift — Reach out	2373
17.5.59		Toplift — Sideshift left	2376

Reference Number	Symbol Form/Shape	Symbol Description/Application	ISO/IEC Registration Number
17.5.60		Toplift — Sideshift right	2377
17.5.61		Twistlocks — Located	2371
17.5.62		Twistlocks — Lock	2370
17.5.63		Twistlocks — Unclock	2369
17.5.64		Upender — Rotate forward	2357
17.5.65		Upender — Rotate backward	2358
